EDUCATION

Washington University in St. Louis (WashU)

Certificate, Full Stack Web Development & Coding

- Earned a grade of A in a rigorous, immersive program focused on building full-stack applications.
- Gained hands-on experience with modern web development technologies, including JavaScript, TypeScript, React, Node.js, Express.js, MongoDB, and PostgreSQL.
- Developed projects utilizing industry best practices such as RESTful APIs, GraphQL, JWT-based authentication, and responsive design.

University of Kerala / APJ Abdul Kalam Technological University

Bachelor of Technology in Computer Science Engineering

- Gained strong foundational knowledge in computer science and engineering concepts, including algorithms, data structures, and software development.
- Completed coursework in programming, database management, and system design.

TECHNICAL SKILLS

Java | Python | JavaScript | TypeScript | ReactJS | Express.js | Node.js | Bootstrap | Tailwind CSS | Bulma | Apollo Client | REST API | Angular | GraphQL | Microservices | Apollo Server | JWT | Bcrypt | Maven | PostgreSQL | MongoDB | NoSQL | MySQL | Oracle | SQL | PL/SQL | SQLite | Spring | Spring Boot | HTML | CSS | JSON | JSP | Selenium | JUnit | Cypress | Cucumber | Git | GitHub | IntelliJ | IDEA | Eclipse | VS Code | NetBeans | Render | Jenkins | Postman | Insomnia | GraphQL Playground | CircleCI | CI/CD pipelines | DevOps | Component & E2E Testing | Agile Methodologies | Object-Oriented Programming (OOP) | MVC | Responsive Web Design | BDD (Behavior-Driven Development)

EXPERIENCE AND PROJECTS

Software Development Engineer (Android and Java)

CellApp Technologies Pvt Ltd, India | 8 Months

- Designed and developed an application, Event Manager, tailored to client specifications for event management on the Android platform.
- Created scalable and efficient modules to handle and organize event details as per user needs.

Software Engineer

OCS Software Pvt Ltd, India | 2 Months

- Developed and implemented widgets for inspection software utilized in oil rig inspections, ensuring precision and usability.

Technical Analyst

IPSR Solutions Ltd, India | 10 Months

- Engineered a mobile application to block specific phone numbers on Android devices by accessing hidden system files, enhancing user privacy.

Code Pro

Washington University in St. Louis (WashU)

- Developed a web application to help students test their knowledge of HTML, CSS, and JavaScript concepts through engaging multiple-choice quizzes.
- Implemented immediate feedback on answers, enhancing the learning experience for users.
- Enabled quiz retakes via a streamlined navigation system, allowing users to revisit the home screen and start over.
- Built with HTML, CSS, JavaScript, and Bootstrap, ensuring a responsive and visually appealing user interface.
- Utilized local storage for saving and retrieving quiz progress, eliminating the need for a backend.

Flavor Quest

Washington University in St. Louis (WashU)

- Built a full-stack recipe-sharing application using the PERN stack (PostgreSQL, Express.js, React, Node.js).
- Designed and implemented REST APIs to handle user authentication, recipe CRUD operations, and comments.

- Integrated user-friendly features such as recipe search, calorie tracking, and favoriting recipes.
- Secured the application with JWT-based authentication for protected access to user-specific content.
- Developed a responsive and interactive React front end, styled with custom CSS and Bootstrap.
- Used PostgreSQL as the primary relational database and implemented database relationships for users, recipes, comments, and favorites.
- Deployed the application on Render, ensuring seamless access to all features in production.

Look Over There

Washington University in St. Louis (WashU)

- Developed a full-stack scavenger hunt application that takes users on an engaging journey to explore fun spots in a city of their choice.
- Enabled users to choose a city and receive five specific locations for exploration, with functionality to check off locations once visited.
- Integrated real-time location-based search, allowing users to discover nearby attractions based on their current GPS coordinates.
- Built using the MERN stack (MongoDB, Express.js, React, Node.js) with TypeScript, Apollo Server, and Apollo Client for GraphQL-based APIs.
- Implemented secure user authentication using JWT (JSON Web Token) and Bcrypt for password hashing and verification, ensuring secure access to user-specific features.
- Utilized Google Platform APIs for location data, geocoding, and proximity-based searches.
- Focused on a seamless and responsive UI/UX, enhancing user experience on both mobile and desktop devices.

Book Search Engine

Washington University in St. Louis (WashU)

- Developed a full-stack web application enabling users to search for books, save favorite titles, delete them, and manage personal book collections.
- Designed and implemented REST APIs for handling user authentication, book management, and user-specific data storage.
- Integrated Google Books API to fetch book details dynamically, enabling users to explore a wide range of book options.
- Implemented user authentication with account creation, login functionality, and secure data storage using JWT authentication.
- Designed and built a user-friendly interface to seamlessly manage saved books.
- Utilized TypeScript for type safety, React for a dynamic front-end interface, and Node.js/Express.js for back-end API development.

ACHIEVEMENTS

- HackerRank Java Gold Badge

TRAINING AND COURSES

- Advanced Selenium Training
